## FROM DOUG KURTZWEIL, CHAIR

New Year's Greetings from the beautiful snow covered shores of your Chippewa Flowage! Just as summer lingered, autumn hung around so long that lots of folks were worrying about a brown Christmas. Well, things worked out and with so many people traveling, several inches of snow was probably better than several feet, but at least it was white. Since then we've gotten enough cold weather to make pretty good ice and have topped it off with a couple of decent snowfalls that have successfully re-created the 'winter wonderland' right on cue. I have not gotten out 'to play' much at all yet, but be assured, I will! It's just too darn gorgeous!!

As most of you know, I like to do a 'Janus' this time of the year — pause...look back...and, then...look ahead. I believe your CFAPOA made some progress over the past year on a couple of fronts. The Clean Boats, Clean Waters project along with the Purple Patrol and 'beetlemania' not only seemed to have held their ground in the ongoing war with invasives, but have made definite progress in several areas. The Big Chip Fish Fest (BCFF) set records for work, fun, funds, and walleyes stocked that will be the new standards in our region. The Chippewa Flowage Forest Legacy Project, a multi-year effort supported by both Democrat and Republican Congressmen and Governors, was successfully completed. It protects, in perpetuity, over 18,000 acres of forest and habitat south of the Flowage mostly between the Dam and the Helsing Road. Watershed protection, sustainable forestry practices, and non-motorized recreational opportunities are guaranteed — and 'development', fragmentation, and gross exploitation are prohibited. After over 5 years of trying, we were finally granted partial relief from the irrational, unscientific largemouth bass regulations that have played a major role in the destruction of our once great walleye fishery. We have instituted enduring Conservation Funds that will, with adequate support, assure the financing for projects now and well beyond the foreseeable future. Wow!! I should raise a glass to all of you — right now!

Let's see, oh yeah, there are still some things to be done. The fishery surveys are proving what we predicted 6 years ago — loads of largemouth bass and not many walleyes. The fall shocking surveys indicate barely enough survival of young-of-the-year walleyes to keep the fishing as 'good' as it was this year. That is unacceptable to me! So, please support the BCFF as much as you can. We must continue to work to get total relief from the irrational and unscientific bass regulations. The efforts to combat milfoil and loose-stripe and other invasives remain critical in maintaining the quality of the Flowage and can always use more help. There is always something to do. Then, a few weeks ago, another matter began to arouse my concern. There is a proposal to start a huge open-pit iron mine in the Penokee Range in southern Ashland and Iron counties. I've done a little research but information on the project and the people seems hard to find. The Ashland County Board was told the initial phase would be a pit about 3/10s of a mile wide by 4 miles long. The full project is planned to be over 5 times as long! Its location would be uphill of and less than 10 miles from Augustine and Gordon Lakes — the headwater sources of the East Fork of the Chippewa River! They stated that the tailings--the mining wastes--would be deposited "on the southern slope". That would be even closer! A bill has been introduced in the Legislature to "streamline" (fast track) the permitting process and relax some of the requirements in current law. Your guidance and assistance has never been more necessary. Any of you who know about this stuff or are willing to 'dig' into it, please let us know at once!

I hope the phenomena of the past looking better than the future is just another sign that I'm getting old. With your continued commitment and support I will do my best to meet those challenges our future appears to hold. Stay warm, and keep your stick on the ice.

# COMMITTEE REPORTS

**MEMBERSHIP** by Carolyn Fritsch

Thank you cards have been mailed to all CFAPOA paid members for the 2011-12 year acknowledging their dues/donations. The amount you paid may be a taxable deduction depending on your personal tax status, and the card is your receipt for tax purposes. Dues/donations are considered a donation because we are now a 501(c)3 organization.

We would like to thank all members who indicated, on their membership form, that they would like to volunteer to help with CFAPOA projects. Your names will be given to project chairmen who will contact you as future needs arise.

Members donating (above \$25 annual dues) may direct these monies to: (1) the General Fund, (2) Conservation Project Fund, or (3) Conservation Trust Fund. THANK YOU to the additional members who donated as shown below:

**STEWARDS (\$100-\$999)**

- Jay & Sally Bruner
- Lisa Costa & William Hunkins
- Bob & Lois Olson

**CONTRIBUTORS (\$26-\$99)**

- |                          |                          |

**SOCIAL** by Donna Gilbertson

Seventy-two members of the CFAPOA and their guests welcomed in the Holiday Season at Ray-Jays' on December 10th. A wide variety of appetizers were enjoyed by all and an evening of camaraderie was capped off by the highly anticipated door-prize raffle and 50/25/25 drawings. Nearly everyone present left with a wonderful gift. Kay Ryan and Steve Richardson were the lucky cash winners.

**SOCIAL (continued)** Thanks to all who donated door prizes and made donations to the Hayward Community Food Shelf and the Northwoods Humane Society.

Our next event is the Spring Fling to be held at Tree-land's Resort, June 2, 2012. More information will be in the next newsletter about this event.

**GOT PICS ?**

by Mike Whetstone

Your Board is exploring the development of a 2013 wall calendar as a fundraiser featuring photographs of the Chippewa Flowage. We need your help! The CFAPOA Board would like you to submit one or more print photographs of the Chippewa Flowage area, seasons on the Flowage, nature, recreation, wildlife, fishing, sunrises/sunsets, etc. – you get the “picture”. The calendar would make a terrific holiday, anniversary, family or birthday gift.

The rules are simple. Send a print copy of any photograph(s) you wish to submit for review. Do not submit photos that can only be scanned as scanning reduces the clarity of images. Photographs will be selected by a panel of the Board and print photographs will not be returned. Winners will be notified and they will need to submit digital copies of their photographs for inclusion in the calendar. Submission of photos, in both print and digital format, constitutes permission for the CFAPOA to include photographs in the calendar, and to market, distribute and sell the calendar. Winners will be asked to execute a permission to use form before any photograph is used in the production of the calendar. The format will be a two-piece display depicting a photograph above and the month below. Cost has not been established, but it will certainly be reasonable. Watch later CFAPOA newsletters for information as this project develops.

Submit your entries by March 31, 2012, to CFAPOA, P.O. Box 555, Hayward, WI 54843-0555. Make sure you include your name and contact information (i.e. telephone number and/or e-mail address) and mark in the lower left corner of the envelope “Picture Contest”. Good luck to all who submit entries!

### BIG CHIP FISH FEST

by Rick Marks, BCFF Co-Chair with John Kaiser  
(Pictures courtesy of John Kaiser)

Friday, October 14th, with the approval of the Wisconsin Department of Natural Resources and Dave Neuswanger, 20,000 Extended Growth (EG) Walleye's were stocked into the Chippewa Flowage in the following locations, Deerfoot Lodge & Resort 5,000 (east), Lake Chippewa Campground 5,000 (east-central), Sisko's Pine Point Resort 5,000 (west-central), Crane Lake 1,000 (west), and Tiger Musky 4,000 (west).

Fish were raised and delivered by a private hatchery Gollon Bait and Fish Farm from Dodgeville Wisconsin. The Extended growth walleye fingerlings were approximately 7" in length with some reaching 10". All fingerlings traveled well, zero fish were lost. Conditions were ideal, with lake temperatures 57 degrees (F), truck temps 58 degrees (F). The first truck arrived early the 14th with stocking beginning shortly after 7:00 am. The second truck finished the process around noon. With 19,000 fingerlings stocked last year (2010), it brings the efforts of the Big Chip Fish Fest (BCFF) to 39,000 total WALLEYE'S STOCKED.

The BCFF is an event of the Chippewa Flowage Area Property Owners Association (CFAPOA) and is held annually on Father's Day at "The Landing Resort" in the middle of the "Big Chip". Denny Reyes and his staff have done an excellent job hosting the event. The event is sponsored by Lake Chippewa Flowage Resort Association (LCFRA), Walleye's For Northwest Wisconsin (WFNW), and the CFAPOA, all donating \$4000.00 each. Support from local business and individuals alike has been remarkable! Major donors include: Tree-land Resorts, Tiger Musky Resort, The Landing, Northern Lakes Co-op, Lynns Custom Meat and Catering, L.C.O. Tribal Board, Spider Lake Golf Course, S.C.O.P.E, Timber Ridge Landscaping and Design, Randy Eytcheson Landscaping, Ron Klimcke of American Suzuki, Bret Alexander Guide Service of Green Bay, John & Marlen Kaiser, Steve & Connie Kelsey, Gary & MaryLou Hosler and Hayward Home Center.

BCFF 2012 - "Father's Day" at The Landing .... see ya there.

Thanks to all large & small.

# 20,000 EXTENDED GROWTH WALLEYES INTO THE BIG CHIP!

by John Kaiser, BCFF Co-Chair with Rick Marks

The first Gollon truck arrived loaded with 16,000 extended growth walleyes at Deerfoot Resort at daylight. The fish were isolated in 16 segregated insulated and oxygen fed tanks. There were 1000 walleyes in each tank and none were floaters. It was cold and really windy as 5000 walleyes were planted at the boat landing.

Denny Aaron, Al McElroy, Nan McElroy, Marlen Kaiser and Paul Ryan (left to right) warm with some hot coffee as they watch as the first of the walleyes go into the Big Chip.

The second 5000 plant was at Sisko's resort, Steve Sisko worked tirelessly selling BCFF ticket bundles, event buttons & pins to raise funds for his project. Paul Ryan, Marlen Kaiser, Al & Nan McElroy, Doug Kurtzweil and Steve Sisko (left to right) enjoy holding a net full of walleyes before they are released.

Rick Marks shows a sample of the extended growth walleyes.

1000 walleyes were stocked in Crane Lake. Here Rick Marks and Al McElroy man the tube.

4000, the last of the 20,000 total were delivered by a second Gollon fish farm truck to Tiger Musky Resort. The Spero's family conducted a season long fundraising effort to support the stocking. They raised over \$1800.00 - a great effort! In this picture, John Kaiser watches as the walleyes pour out at the Tiger Musky's boat landing.

5000 walleyes were planted at the Chippewa Campground boat launch. Grampa Paul and Gramma Kay Ryan show granddaughter Lilly the fish. Al McElroy is in the background and Rick Marks is next to the truck on the right.

John Kaiser and Rick Marks present checks of \$28,000 from the BCFF (Big Chip Fish Fest) and \$4000 from Walleyes for Northwest WI to the Gollon Fish Farm driver. At the end of the day, 20,000 of these golden beauties were swimming in the flowage. That amounts to 1.3 fish per acre, an astounding accomplishment in the 15,300 acre Big Chip. This was the culmination of a summer & fall of fund raising by a coalition of partnerships thanks go out everyone who helped make this incredible day possible!!

## WHAT WILL HAPPEN TO OUR VACATION HOME?

by Chris Jeffords

At an annual convention of Wisconsin Lakes some time ago I attended a very interesting, timely and probably appropriate seminar for some CFAPOA members on what actions could be taken to help keep vacation homes in the family. While some may have already taken steps to provide for their property in their wills, if you haven't this may provide the incentive to do so. It was given by the WL legal advisory and between the handouts and my notes I will try to summarize most of the key points here.

### Why take any action?

- A. Huge asset - like many homeowners recently, the value of our home and cabins have at best held their value if not declined somewhat. But what still remains is a large asset whether we purchased it years ago or not. Financially it may make sense to keep it in the family for tax/estate tax reasons.
- B. Many memories ... Aside from the financial aspect, for many of us it has been a place to enjoy ourselves, our children and grandchildren. Fishing, swimming, boating and all the memories we have of the times on the lake watching our families grow through the years. We hope to pass this on to the next generation so they can enjoy the same.

### Some options:

- A. Immediate transfer - the owner can transfer the title and still retain the right to use for the rest of their life (life estate) or any of many other conditions in the transfer.
- B. Vacation home trust - the owner can transfer the title in a revocable trust that allows the owner to change their mind if the need the asset.
- C. Cottage-in-common agreement - this option is similar to a partnership where multiple family members agree upon a set of terms in contractual form. Shared use, responsibilities, governance and rights for sale or dissolution are all covered.
- D. Cottage club or company - this option usually involves the creation of a nonstick corporation or limited liability company as a separate entity but limiting membership to the family. This can be somewhat complex and suitable primarily for businesses, partnerships, etc.

### Some considerations:

As you may be going through the options for your particular situation, there are some basis considerations that need to be addressed.

- A. The family. Are the owners married? How old are the owners? Do they hope and expect to keep the cottage for the remainder of their lives? Do the owners have assets that could be used to establish a fund to assist in future vacation home taxes and other expenses? How many children do the owners have? Are all of the children interested in the cottage? Do they live nearby? Are all of the children financially able to carry their weight? Are they married? How many grandchildren do the owners expect? Are there issues of divorce, stepchildren, or blended families? Do the owners have sufficient assets not requiring sale? Are the children financially stable? Do they have adequate incomes to afford proper care of the vacation home? Do the owners have sufficient assets (other than the vacation home) to cover potential long-term medical care?
- B. The property. Is the property in good shape, or is there significant deferred maintenance? Will significant capital improvements be required in the foreseeable future to maintain the property's value and utility? Is the vacation home located on a small lot or a larger holding? Would a future division of the property to create separate ownership interests for more than one child be feasible? What property (boats, piers, home furnishings, etc) should be included?

**... OUR VACATION HOME? - continued**

C. The taxes. *Capital gains* from the sale of property is taxable as determined from the property's purchase price and adjustments to current value when it is transferred to a descendent upon the owner's death. *Estate tax* at death values the assets of the estate and certain prior transfers. Planning must be coordinated with broader estate planning matters. Gift taxes do tax gifts above an inflation-adjusted minimum amount per person per year. In addition, there's a lifetime exclusion of a specified amount. Giving the vacation home to children would consume that minimum and eat into, if not consume, the lifetime exclusion. The effect of gift taxes is generally managed in an estate plan. *Generation-skipping-transfer tax* does tax a gift to a grandchild, or similar distance in kinship or age, at the highest federal estate tax rate. And finally, *property taxes* need to be kept up. How will they be paid?

**With all of this in mind, what should I do?**

This brief summary of the session at the annual WL Convention is only a beginning glance at the issues involved in transferring ownership of properties such as lake homes. Further and more in-depth analysis should be a next step if one is at all interested. Determine if keeping your lake home in the family is a legacy you may want to leave, and if so, obtain assistance to help outline the details and make the transfer work for you and your family. Your children, grandchildren and hopefully generations to come will remember and thank you.

**Chippewa Storage Reservoir Forecast**

**Elevation as of December 7, 2011:** 1312.08 ft.

**Season:** Winter 2011-12

**Typical Winter Low Elevation:** 1308.0 ft.

**2011-12 Projected Winter Low Elevation:** 1308.0 ft.

**Comments**

- ▶ Moderately strong river inflows to the reservoir through the Fall period allowed the reservoir elevation to fill to within one-foot of the normal full elevation, in spite of sparse precipitation from September 1 – November 30 (3.55”).
- ▶ Based on the current reservoir level and the moderately strong inflow going into the winter season, Xcel Energy forecasts to draw down the reservoir to an elevation of 1308.0 ft. this winter. The drawdown last winter was 5.25 ft. (elevation 1307.75 ft.).
- ▶ The projected 1308.0 ft. drawdown elevation is based on an average winter snowpack and moderately strong river inflows into the reservoir during the winter months.
- ▶ Discharge flows from the dam will be maintained slightly above minimum levels (>250 cubic feet per second) at the onset of winter with increases in discharge through the winter months to reduce the reservoir to the projected 1308.0 ft. elevation.
- ▶ Xcel Energy intends to monitor the reservoir level, snowpack, and inflows throughout the winter season to determine if it is necessary to modify the target winter low elevation.
- ▶ If significant snowpack begins accumulating during the winter season, additional water will be drawn from the reservoir, which will likely reduce the reservoir level below the projected 1308.0 ft. elevation.

*For information on current reservoir level and discharge from the Chippewa Reservoir dam, please go to the Wisconsin DNR's website at the following address and click on the link to water levels:*

<http://dnr.wi.gov/org/land/facilities/chippewafLOW/index.html>

Definitions of Seasons of the Year for Operating the Chippewa Storage Reservoir:

- Winter: December 1 – March 30
- Spring: April 1 – June 1
- Summer: June 2 – September 30
- Fall: October 1 – November 30

- ▶ Many ice drownings involve children. When your child is near the ice, you should be near your child.
- ▶ Avoid alcoholic beverages when you're on the ice. They can make you feel colder and slow down your reaction time in case of an ice emergency.
- ▶ Carry two large nails to use as ice picks to pull yourself out if you fall through thin ice.
- ▶ Never drive on the ice at night.
- ▶ Avoid pressure ridges and areas with current, if you do choose to drive on the ice.
- ▶ Drive with your windows down and doors partially open to avoid becoming trapped if your car breaks through.

## Loons on the Chippewa Flowage

by Nancy and Jerry Johnson

Our 2011 loon count was patterned after those conducted by LoonWatch at Northland College. Normally these surveys are done once every 5 years. Last summer's survey was added because they wanted to assess the effect of the gulf oil spill on loon population. The next scheduled Wisconsin Loon Population Survey will be in 2015.

In the meantime, for anyone who would like to know more about loons or become involved in other ways visit the LoonWatch website at [www.loonwatch.org/](http://www.loonwatch.org/) LoonWatch conducts an Annual Lakes Monitoring Program. Individuals known as "loon rangers" can choose a lake in Wisconsin on which to monitor loons from ice out to ice in. Forms are sent out in the spring on which to record things such as when loons arrive, if they nest, if they have chicks, and if there have been any threats to the nest site. You might choose a part of the flowage where you live or go often. Since this is done individually, you can monitor as often as you wish and on the days you choose. If this sounds interesting visit the LoonWatch website above. Under "Pages" choose Loon Ranger Frequently Asked Questions.

There is a wealth of information about loons at this website, including a link to the loons that were implanted with satellite tracking devices used to follow their migration this fall. You can see where individual loons from northern Wisconsin, Minnesota, and Michigan are spending their winter.

## EXPANDED DNR HOURS SOON

## TOWN OF HUNTER NEWS

[<http://home.centurytel.net/huntertownship>]

- ✓ Town meeting will now start at 6:00 pm instead of 6:30 on the second Wednesday of each month
- ✓ Spring Clean-up will be on June 2nd.
- ✓ Garbage hours start May 5th for Saturday, Monday and Wednesday.
- ✓ Garbage hours return to Saturdays only on September 29th.

## CFAPOA IMPORTANT ORGANIZATIONS

New to CFAPOA? Being connected with other organizations that value the Chippewa Flowage is important for us. Below is a description of the various organizations CFAPOA works with during the year to help and protect the Chippewa Flowage. If you have any questions or want more information, please contact the CFAPOA liaison listed on page 9.

### **CWRLT — Couderay Waters Regional Land Trust**

CWRLT's mission is "protecting and promoting preservation of the natural environment of Northwestern Wisconsin through land conservancy." They were very instrumental in helping us with the Chippewa Islands Project. (The purchase of Big Timber and Moonshine Islands.) Individuals may belong directly to this group. CFAPOA Directors Doug Kurtzweil and Chris Jeffords serve on its Board of Directors. For more information, please go to [www.cwrlt.org](http://www.cwrlt.org) or write them at CWRLT, PO Box 13097, Hayward, WI 54843.

### **LCFRA — Lake Chippewa Flowage Resort Association**

LCFRA is an organization of resorts and businesses on or near the Chippewa Flowage. We have partnered with them on numerous projects over the years, e.g. fish cribs, Chippewa Flowage Islands Project, and 75th Anniversary of the Chippewa Flowage. Their website is extensive and has many useful features like trail conditions, fishing reports and local events. Check it out at: [www.chippewaflowage.com](http://www.chippewaflowage.com) They even offer free screen saver downloads of our lake.

### **SCLF — Sawyer County Lakes Forum**

The CFAPOA is an active member of SCLF. In fact, CFAPOA Director Chris Jeffords serves as Vice Chair on the SCLF Board of Directors. "The purpose of the Forum is to facilitate education, research, and sharing between organizations, individuals, governmental bodies, and the general public of Sawyer County; to maintain and improve Sawyer County's water bodies, environs, and watersheds for now and future generations, including, but not limited to: aesthetics, water quality, wildlife habitat, fisheries, and recreation. These purposes will be accomplished while respecting the rights of property owners." For more information, contact them at Sawyer County Lakes Forum, PO Box 20, Hayward, WI 54843 or online at [www.sawyercountylakesforum.org](http://www.sawyercountylakesforum.org)

### **WL — Wisconsin Lakes**

CFAPOA is a member of WL also. CFAPOA Directors and members are encouraged to attend WL sponsored conferences to keep informed of all the issues that effect our lake and lakes around the state. CFAPOA Director Chris Jeffords also serves on the Executive Committee and Board of Directors for this organization. WL is a "nonprofit group of citizens, organizations, and businesses working for clean, safe, healthy lakes for everyone." If you're interested in joining this group as an individual, you can contact them at WL, One Point Place, Suite 101, Madison, WI 53719 or online at [www.wisconsinlakes1.org](http://www.wisconsinlakes1.org)

### And, a few more pictures from the BCFF ...
